

**2022-2-ES01-KA210-VET-000096341****Project objectives:**

EnVET aims at supporting the professional development of educators engaged in Vocational education and training in order to assure high-quality education to VET learners, as well as to meet their demands in the society reshaped by the worldwide health and economic crisis.

The ENVET project's main objective is:

- To provide opportunities for professional development for VET educators through an e-learning platform designed by a team of experts able to tailor it to the real needs identified in the professional markets.

Project results:

- Collected good practices for professional development of VET educators .
- Developed Guidelines for skills and competences.
- Developed methodology for work-based learning in digital environment.
- Developed e-learning platform with 6 training modules.
- Piloted Training of trainers that will focus on work-learning methods in a digital environment for VET educators.
